**Georgia Chiropractic Associates**  
**Personal Injury/Motor Vehicle Collision Financial Policy**

We at Georgia Chiropractic Associates want all our patients to recover their health as soon as possible. We also take extra steps to inform patients on their financial options as well. You have a few options regarding payment for some services rendered in our office regarding a personal injury claim.

1. **Med pay coverage on the vehicle you were in.** This coverage is no fault insurance and is the most effective means of acquiring care you need because you pay for this coverage and it does not need to be paid back. Also there is no out of pocket expense for most services, up to the limits of the policy. **IT IS AGAINST THE LAW TO RAISE INSURANCE RATES OF AN INDIVIDUAL BASED ON USING THEIR MED PAY.** Contact your insurance company; ask what your med pay limit is. Tell them you would like to utilize your med pay coverage. They will set up a claim for you. Supply this office with the insurance name and address for claims to be sent to, claim number, phone number and name of the representative.
2. **Health care insurance:** the following must be done by you.
  - a. All deductibles, coinsurance and co payments must be paid for at the time of service.
  - b. If we are contracted providers with your company, we will bill your insurance. Your insurance company will require contact from you to provide them with the at-fault insurance company information and/or attorney information. If you do not provide them with this information, your services will not be paid for. You must do this immediately.
  - c. Depending on your insurance company contract, some medically necessary services may not be a covered benefit.
  - d. Your insurance company will require you to reimburse them from the settlement you will receive from the at fault insurance company after your treatment is completed.
3. **Attorney representation:** We will wait until settlement for payment of services rendered in this office. Attorney representation is almost always needed for more fair reimbursement from the insurance company that is responsible for the case.
4. **Cash/Credit Card**
